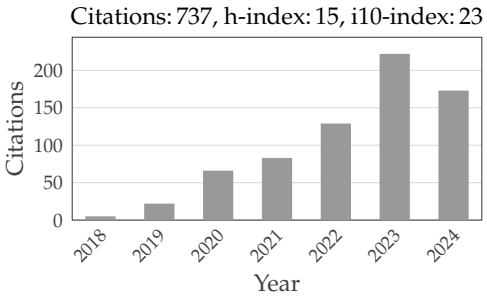
Research Interests and Highlights

My research in *scientific machine learning* lies at the intersection of computational science and artificial intelligence, focusing on the development of scalable, data-driven methods that integrate strengths from both fields to tackle challenging problems in computational science and engineering. Keywords defining my current research interests include: computational science, deep learning, generative models, and uncertainty quantification.



Over the past years, I have published 38 peer-reviewed articles, including 17 first-author papers in high-impact journals and conference proceedings, such as NeurIPS, ICML, ICLR, Interspeech, MIDL, SPIE, TMLR, and Geophysics.

Academic Appointments

Rice University — August 2022 – Present
Simons Postdoctoral Fellow — Houston, TX, USA
Department of Computational Applied Mathematics & Operations Research
Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk

Education

Georgia Institute of Technology — August 2022
Ph.D. in Computational Science and Engineering (minor in Applied Math.) — Atlanta, GA, USA
Advised by Felix J. Herrmann

University of Tehran — March 2016
M.Sc. in Geophysics — Tehran, Iran

Sharif University of Technology — August 2013
B.Sc. in Electrical Engineering — Tehran, Iran

Awards

George R. Brown School of Engineering, Rice University — June 2024
Future Faculty Fellows Award — Houston, TX, USA

The University of British Columbia — August 2016 – August 2017
Faculty of Science PhD Tuition Award — Vancouver, BC, Canada

Publications

Talks

Invited Talks

T22. **CNRS, Université Montpellier** — January 2023
Low-cost uncertainty quantification for large-scale inverse problems — Virtual oral presentation
RhEoVOLUTION Group (Dr. Andréa Tommasi)

T21. **Workshop on Subsurface Uncertainty Description and Estimation** — August 2022
Reliable amortized variational inference with conditional normalizing flows via — Oral presentation

physics-based latent distribution correction
International Meeting for Applied Geoscience & Energy

T20. **Intelligent illumination of the Earth Workshop** June 2021
Fast and reliability-aware seismic imaging with conditional normalizing flows Virtual oral presentation
King Abdullah University of Science and Technology

T19. **Advances in Seismic Imaging and Inversion Mini-symposium** October 2020
Unsupervised data-guided uncertainty analysis in imaging and horizon tracking Virtual oral presentation
The 3rd Annual Meeting of the SIAM Texas–Louisiana Section

Contributed Talks

T18. **International Conference on Machine Learning** July 2023
Unearthing InSights into Mars: Unsupervised source separation with limited data Poster presentation

T17. **Symposium on Advances in Approximate Bayesian Inference** July 2023
Refining amortized posterior approximations using gradient-based summary statistics Poster presentation

T16. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023
Martian time-series unraveled: A multi-scale nested approach with factorial variational autoencoders Oral presentation

T15. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023
Unearthing InSights into Mars: Unsupervised source separation with limited data Oral presentation

T14. **International Meeting for Applied Geoscience & Energy** August 2022
Velocity continuation with Fourier neural operators for accelerated uncertainty quantification Oral presentation

T13. **Chrome Media Team, Google** December 2021
Low-bitrate speech coding with Transformers Virtual oral presentation

T12. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021
Multifidelity conditional normalizing flows for physics-guided Bayesian inference Virtual oral presentation

T11. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach Virtual oral presentation

T10. **Society of Exploration Geophysicists International Exposition and Annual Meeting** September 2021
Learning by example: Fast reliability-aware seismic imaging with normalizing flows [Link to video] Virtual oral presentation

T9. **Symposium on Advances in Approximate Bayesian Inference** January 2021
Preconditioned training of normalizing flows for variational inference in inverse problems [Link to video] Prerecorded short oral presentation

T8. **European Association of Geoscientists & Engineers Annual Conference & Exhibition** December 2020
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification Virtual oral presentation

T7. **Society of Exploration Geophysicists International Exposition and Annual Meeting** October 2020
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach [Link to video] Virtual oral presentation

T6. **Society of Exploration Geophysicists International Exposition and Annual Meeting** October 2020
Weak deep priors for seismic imaging [Link to video] Virtual oral presentation

T5. **Society of Exploration Geophysicists Student Chapter, Georgia Tech** February 2020
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification Oral presentation

T4. **HotCSE Seminar, CSE Department, Georgia Institute of Technology** November 2019
Learned imaging with constraints and uncertainty quantification Oral presentation

T3. **Society of Exploration Geophysicists International Exposition & Annual Meeting** September 2019
Deep-learning based ocean bottom seismic wavefield recovery Oral presentation

T2. **Society of Exploration Geophysicists International Exposition & Annual Meeting** September 2019
Surface-related multiple elimination with deep learning Oral presentation

T1. **Society of Exploration Geophysicists International Exposition & Annual Meeting** October 2018
Deep convolutional neural networks in prestack seismic—two exploratory examples Poster presentation
