Last updated: October 9, 2024

Research Interests and Highlights

My research, under the mentorship of Maarten V. de Hoop and Richard G. Baraniuk, focuses on developing a framework to understand and address AI reliability concerns through computational science principles, focusing on quantifying model uncertainty and incorporating domain-specific knowledge, e.g., system invariances, mathematical constraints, and physical principles.

I have published 39 peer-reviewed articles (citations: 830, h-index: 17, i10-index: 25), including 17 first-author papers in high-impact journals and conference proceedings, such as NeurIPS, ICML, and ICLR.

Education

Georgia Institute of Technology Ph.D. in Computational Science and Engineering (minor in Applied Math.) Advised by Felix J. Herrmann	August 2022 Atlanta, GA, USA
---	---------------------------------

University of Tehran M.Sc. in Geophysics	March 2016 Tehran, Iran
--	----------------------------

Sharif University of Technology B.Sc. in Electrical Engineering	August 2013 Tehran, Iran
---	-----------------------------

Academic Appointments

Rice University Simons Postdoctoral Fellow Department of Computational Applied Mathematics & Operations Research Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk	August 2022 – Present Houston, TX, USA

Awards

Future Faculty Fellows Award

Rice University, George R. Brown School of Engineering
[link]

June 2024
Houston, TX, USA

Selected Research Proposal Experience

Scientific ML-supported subsurface characterization in physical function spaces

Awarded, 2024

- Funding Source: Occidental Petroleum Corporation, PI: Maarten V. de Hoop
- **Contributions:** Developed ideas and contributed to writing for two of the four research thrusts entitled “Score diffusion, nonlinear operators, and uncertainty quantification in function spaces” and “Unsupervised, factorial data decomposition and hidden signals: Reservoir characterization below salt, denoising, and monitoring”

Learning and forecasting complex fault dynamics – Predictability of earthquakes

Not funded, 2024

- Funding Source: National Science Foundation, PI: Maarten V. de Hoop
- **Contributions:** Developed ideas and contributed to writing for one of the four research thrusts entitled “Structure in data, clustering, lattice theory, and diffusion models”

Exploring the local geometry of deep networks

Awarded, 2023

- Funding Source: Office of Naval Research (DURIP), PI: Richard G. Baraniuk
- **Contributions:** Developed ideas and wrote research objectives for one of the three research thrusts entitled “The geometry of deep probabilistic models”

A deep-learning framework for stable, interpretable, and uncertainty-quantified hybrid modeling of multi-scale complex systems

Not funded, 2023

- Funding Source: Department of Energy, PI: Pedram Hassanzadeh
- **Contributions:** Coordinated efforts within Richard G. Baraniuk’s group (a co-PI) to develop and write research objectives for one of the four research thrusts entitled “Spline operator-based analysis of Deep neural networks”

Topological deep learning, causal inference, and data-driven forecasting for subsurface multiscale multiphysics systems

Awarded, 2022

- Funding Source: Department of Energy, PI: Maarten V. de Hoop
- **Contributions:** Led the effort to write the annual progress report

Mentoring Experience

Paul M. Mayer [link]

PhD Student, Rice University

2022 – Present
Houston, TX, USA

Contributions: Advised on the development of methods and software for two projects and co-authored two papers (Luzi et al., 2024a; Mayer et al., 2024)

Rafael Orozco [link]

PhD Student, Georgia Institute of Technology

2020 – 2022
Atlanta, GA, USA

Contributions: Advised on the development of methods and software for main PhD thesis and co-authored four papers (Orozco et al., 2021, 2023b,c, 2024a)

Mi Zhang [link]

Visiting PhD Student, China University of Petroleum-Beijing

Contributions: Advised on the development of methods and software for a project and co-authored a paper (Zhang et al., 2020)

2019 – 2020

Atlanta, GA, USA

Teaching Experience

Talks

Invited Talks

T22. CNRS, Université Montpellier

January 2023

Low-cost uncertainty quantification for large-scale inverse problems
RhEoVOLUTION Group (Dr. Andréa Tommasi)

Virtual oral presentation

T21. Workshop on Subsurface Uncertainty Description and Estimation

August 2022

Reliable amortized variational inference with conditional normalizing flows via
physics-based latent distribution correction
International Meeting for Applied Geoscience & Energy

Oral presentation

T20. Intelligent illumination of the Earth Workshop

June 2021

Fast and reliability-aware seismic imaging with conditional normalizing flows
King Abdullah University of Science and Technology

Virtual oral presentation

T19. Advances in Seismic Imaging and Inversion Mini-symposium

October 2020

Unsupervised data-guided uncertainty analysis in imaging and horizon
tracking
The 3rd Annual Meeting of the SIAM Texas–Louisiana Section

Virtual oral presentation

Contributed Talks

T18.	International Conference on Machine Learning Unearthing InSights into Mars: Unsupervised source separation with limited data	July 2023 Poster presentation
T17.	Symposium on Advances in Approximate Bayesian Inference Refining amortized posterior approximations using gradient-based summary statistics	July 2023 Poster presentation
T16.	Geo-Mathematical Imaging Group Partners Meeting, Rice University Martian time-series unraveled: A multi-scale nested approach with factorial variational autoencoders	May 2023 Oral presentation
