Last updated: August 14, 2024

## Research Interests and Highlights

My research in *scientific machine learning*, under the mentorship of Maarten V. de Hoop and Richard G. Baraniuk, lies at the intersection of computational science and artificial intelligence, focusing on developing scalable, data-driven methods that leverage the strengths of both fields to address challenging, large-scale problems in computational science and engineering. Keywords defining my current research interests include: Bayesian deep learning, computational science, generative models, and uncertainty quantification.

Over the past years, I have published 39 peer-reviewed articles, including 17 first-author papers in high-impact journals and conference proceedings, such as NeurIPS, ICML, ICLR, Interspeech, MIDL, SPIE, TMLR, and Geophysics.

## Education

### Georgia Institute of Technology

Ph.D. in Computational Science and Engineering (minor in Applied Math.)

Advised by Felix J. Herrmann

August 2022

Atlanta, GA, USA

### University of Tehran

M.Sc. in Geophysics

March 2016

Tehran, Iran

### Sharif University of Technology

B.Sc. in Electrical Engineering

August 2013

Tehran, Iran

## Academic Appointments

### Rice University

Simons Postdoctoral Fellow

Department of Computational Applied Mathematics & Operations Research

Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk

August 2022 – Present

Houston, TX, USA

## Publications

Google Scholar profile: <https://scholar.google.com/citations?user=sxRMqYIAAAAJ&h>

## In Preparation & Under Review

- P4. A. Siahkoohi, R. Morel, R. Balestrieri, E. Allys, G. Sainton, T. Kawamura, and M. V. de Hoop. Martian time-series unraveled: A multi-scale nested approach with factorial variational autoencoders. Preprint arXiv:2305.16189; under review by *IEEE Transactions on Neural Networks and Learning Systems*, 2024 [pdf] [code] [slides] [bib]
- P3. P. M. Mayer, L. Luzi, A. Siahkoohi, D. H. Johnson, and R. G. Baraniuk. Removing bias from maximum likelihood estimation with model autophagy. Preprint arXiv:2405.13977; under review by *NeurIPS*, 2024 [pdf] [bib]

- P2. L. Baldassari, [A. Siahkoohi](#), J. Garnier, K. Sølna, and M. V. de Hoop. Taming score-based diffusion priors for infinite-dimensional nonlinear inverse problems. Preprint arXiv:2405.15676; under review by *NeurIPS*, 2024  
[pdf] [bib]
- P1. R. Orozco, [A. Siahkoohi](#), M. Louboutin, and F. J. Herrmann. ASPIRE: Iterative amortized posterior inference for Bayesian inverse problems. Preprint arXiv:2405.05398; under review by *Inverse Problems*, 2024a  
[pdf] [code] [bib]

## Awards

### Rice University

George R. Brown School of Engineering  
Future Faculty Fellows Award

June 2024  
Houston, TX, USA

## Selected Research Proposal Experience

**Topological deep learning, causal inference, and data-driven forecasting for subsurface multiscale multiphysics systems**

Awarded in 2022

► Funding Source: Department of Energy

In Progress

► Principal Investigator: Maarten V. de Hoop

► **Contributions:** Led the effort to write the annual progress report

June 2024

**Learning and forecasting complex fault dynamics – Predictability of earthquakes**

Submitted in 2024

► Funding Source: National Science Foundation

Under Review

► Principal Investigator: Maarten V. de Hoop

► **Contributions:** Developed ideas and wrote for one of the four research thrusts

March 2024

– Structure in data, clustering, lattice theory, and diffusion models

- Scientific ML-supported subsurface characterization in physical function spaces** Awarded in 2024  
In Progress
- ▶ Funding Source: Occidental Petroleum Corporation
  - ▶ Principal Investigator: Maarten V. de Hoop
  - ▶ **Contributions:** Developed ideas and wrote for two of the four research thrusts November 2023
    - Score diffusion, nonlinear operators, and uncertainty quantification in function spaces
    - Unsupervised, factorial data decomposition and hidden signals: Reservoir characterization below salt, denoising, and monitoring
- Exploring the local geometry of deep networks** Awarded in 2023  
In Progress
- ▶ Funding Source: Office of Naval Research (DURIP)
  - ▶ Principal Investigator: Richard G. Baraniuk
  - ▶ **Contributions:** Developed ideas and wrote for a research objective within one of the three research thrusts May 2023
    - The geometry of deep probabilistic models

## Professional Service

## Mentoring Experience

---

<b>Paul M. Mayer</b> <a href="#">[link]</a> PhD Student, Rice University	2022 – Present Houston, TX, USA
<ul style="list-style-type: none"> <li>▸ <b>Contributions:</b> Advised on the development of methods and software for two research projects on generative models</li> <li>▸ <b>Outcomes:</b> Co-authored two papers in the two projects (Luzi et al., 2024a; Mayer et al., 2024)</li> </ul>	

- Rafael Orozco** [\[link\]](#) 2021 – 2022  
PhD Student, Georgia Institute of Technology Atlanta, GA, USA
- **Contributions:** Advised on the development of methods and software for scalable uncertainty quantification in medical imaging with generative models
  - **Outcomes:** Co-authored four papers in this project (Orozco et al., 2021, 2023b,c, 2024a)
- Mi Zhang** [\[link\]](#) 2019 – 2020  
Visiting PhD Student, China University of Petroleum-Beijing Atlanta, GA, USA
- **Contributions:** Advised the student in developing a method for speeding up a prior work of mine (A. Siahkoobi et al., 2019b) and assisted in writing the manuscript
  - **Outcomes:** Co-authored a paper in this project (Zhang et al., 2020)

## Talks

---

### Invited Talks

- T22. **CNRS, Université Montpellier** January 2023  
Low-cost uncertainty quantification for large-scale inverse problems Virtual oral presentation  
RhEoVOLUTION Group (Dr. Andréa Tommasi)
- T21. **Workshop on Subsurface Uncertainty Description and Estimation** August 2022  
Reliable amortized variational inference with conditional normalizing flows via Oral presentation  
physics-based latent distribution correction  
International Meeting for Applied Geoscience & Energy
- T20. **Intelligent illumination of the Earth Workshop** June 2021  
Fast and reliability-aware seismic imaging with conditional normalizing flows Virtual oral presentation  
King Abdullah University of Science and Technology
- T19. **Advances in Seismic Imaging and Inversion Mini-symposium** October 2020  
Unsupervised data-guided uncertainty analysis in imaging and horizon Virtual oral presentation  
tracking  
The 3rd Annual Meeting of the SIAM Texas–Louisiana Section

### Contributed Talks

- T18. **International Conference on Machine Learning** July 2023  
Unearthing InSights into Mars: Unsupervised source separation with limited data Poster presentation
- T17. **Symposium on Advances in Approximate Bayesian Inference** July 2023  
Refining amortized posterior approximations using gradient-based summary Poster presentation  
statistics
- T16. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023  
Martian time-series unraveled: A multi-scale nested approach with factorial Oral presentation  
variational autoencoders
- T15. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023  
Unearthing InSights into Mars: Unsupervised source separation with limited data Oral presentation
- T14. **International Meeting for Applied Geoscience & Energy** August 2022  
Velocity continuation with Fourier neural operators for accelerated uncertainty Oral presentation  
quantification
- T13. **Chrome Media Team, Google** December 2021  
Low-bitrate speech coding with Transformers Virtual oral presentation
- T12. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021  
Multifidelity conditional normalizing flows for physics-guided Bayesian Virtual oral presentation  
inference

- T11. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021  
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach Virtual oral presentation
- T10. **Society of Exploration Geophysicists International Exposition and Annual Meeting** September 2021  
Learning by example: Fast reliability-aware seismic imaging with normalizing flows Virtual oral presentation  
[video]
- T9. **Symposium on Advances in Approximate Bayesian Inference** January 2021  
Preconditioned training of normalizing flows for variational inference in inverse problems Prerecorded short oral presentation  
[video]
- T8. **European Association of Geoscientists & Engineers Annual Conference & Exhibition** December 2020  
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification Virtual oral presentation
- T7. **Society of Exploration Geophysicists International Exposition and Annual Meeting** October 2020  
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach Virtual oral presentation  
[video]
- T6. **Society of Exploration Geophysicists International Exposition and Annual Meeting** October 2020  
Weak deep priors for seismic imaging Virtual oral presentation  
[video]
- T5. **Society of Exploration Geophysicists Student Chapter, Georgia Tech** February 2020  
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification Oral presentation
- T4. **HotCSE Seminar, CSE Department, Georgia Institute of Technology** November 2019  
Learned imaging with constraints and uncertainty quantification Oral presentation
- T3. **Society of Exploration Geophysicists International Exposition & Annual Meeting** September 2019  
Deep-learning based ocean bottom seismic wavefield recovery Oral presentation
- T2. **Society of Exploration Geophysicists International Exposition & Annual Meeting** September 2019  
Surface-related multiple elimination with deep learning Oral presentation
- T1. **Society of Exploration Geophysicists International Exposition & Annual Meeting** October 2018  
Deep convolutional neural networks in prestack seismic—two exploratory examples Poster presentation
