Last updated: July 15, 2024

Research Interests and Highlights

My research in *scientific machine learning* aims to overcome barriers to fully unlocking AI's potential in computational science. I develop scalable, data-driven methods that integrate strengths from both fields to tackle challenging problems in computational science and engineering.

Keywords defining my current research include: **computational science**, **deep learning**, **generative models**, and **uncertainty quantification**.

Over the past years, I have published 38 peer-reviewed articles, including 17 first-author papers in high-impact journals and conference proceedings, such as NeurIPS, ICML, ICLR, Interspeech, MIDL, SPIE, TMLR, and Geophysics.

Academic Appointments

Rice University
Simons Postdoctoral Fellow
Department of Computational Applied Mathematics & Operations Research
Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk

August 2022 – Present
Houston, TX, USA

Education

Georgia Institute of Technology
Ph.D. in Computational Science and Engineering (minor in Applied Math.)
Advised by Felix J. Herrmann

August 2022
Atlanta, GA, USA

University of Tehran
M.Sc. in Geophysics

March 2016
Tehran, Iran

Sharif University of Technology
B.Sc. in Electrical Engineering

August 2013
Tehran, Iran

Publications

Talks

Invited Talks

- | | |
|--|--------------|
| T22. CNRS, Université Montpellier | January 2023 |
| Low-cost uncertainty quantification for large-scale inverse problems
RhEoVOLUTION Group (Dr. Andréa Tommasi) | |
| T21. Workshop on Subsurface Uncertainty Description and Estimation | August 2022 |
| Reliable amortized variational inference with conditional normalizing flows via
physics-based latent distribution correction
International Meeting for Applied Geoscience & Energy | |
| T20. Intelligent illumination of the Earth Workshop | June 2021 |
| Fast and reliability-aware seismic imaging with conditional normalizing flows
King Abdullah University of Science and Technology | |
| T19. Advances in Seismic Imaging and Inversion Mini-symposium | October 2020 |
| Unsupervised data-guided uncertainty analysis in imaging and horizon
tracking | |

Contributed Talks

- | | | |
|------|--|---|
| T18. | International Conference on Machine Learning
Unearthing InSights into Mars: Unsupervised source separation with limited data | July 2023
Poster presentation |
| T17. | Symposium on Advances in Approximate Bayesian Inference
Refining amortized posterior approximations using gradient-based summary statistics | July 2023
Poster presentation |
| T16. | Geo-Mathematical Imaging Group Partners Meeting, Rice University
Martian time-series unraveled: A multi-scale nested approach with factorial variational autoencoders | May 2023
Oral presentation |
| T15. | Geo-Mathematical Imaging Group Partners Meeting, Rice University
Unearthing InSights into Mars: Unsupervised source separation with limited data | May 2023
Oral presentation |
| T14. | International Meeting for Applied Geoscience & Energy
Velocity continuation with Fourier neural operators for accelerated uncertainty quantification | August 2022
Oral presentation |
| T13. | Chrome Media Team, Google
Low-bitrate speech coding with Transformers | December 2021
Virtual oral presentation |
| T12. | ML4SEISMIC Partners Meeting, Georgia Institute of Technology
Multifidelity conditional normalizing flows for physics-guided Bayesian inference | November 2021
Virtual oral presentation |
| T11. | ML4SEISMIC Partners Meeting, Georgia Institute of Technology
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach | November 2021
Virtual oral presentation |
| T10. | Society of Exploration Geophysicists International Exposition and Annual Meeting
Learning by example: Fast reliability-aware seismic imaging with normalizing flows [Link to video] | September 2021
Virtual oral presentation |
| T9. | Symposium on Advances in Approximate Bayesian Inference
Preconditioned training of normalizing flows for variational inference in inverse problems [Link to video] | January 2021
Prerecorded short oral presentation |
| T8. | European Association of Geoscientists & Engineers Annual Conference & Exhibition
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification | December 2020
Virtual oral presentation |
| T7. | Society of Exploration Geophysicists International Exposition and Annual Meeting
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach [Link to video] | October 2020
Virtual oral presentation |
| T6. | Society of Exploration Geophysicists International Exposition and Annual Meeting
Weak deep priors for seismic imaging [Link to video] | October 2020
Virtual oral presentation |
| T5. | Society of Exploration Geophysicists Student Chapter, Georgia Tech
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification | February 2020
Oral presentation |
| T4. | HotCSE Seminar, CSE Department, Georgia Institute of Technology
Learned imaging with constraints and uncertainty quantification | November 2019
Oral presentation |
| T3. | Society of Exploration Geophysicists International Exposition & Annual Meeting
Deep-learning based ocean bottom seismic wavefield recovery | September 2019
Oral presentation |
| T2. | Society of Exploration Geophysicists International Exposition & Annual Meeting
Surface-related multiple elimination with deep learning | September 2019
Oral presentation |
| T1. | Society of Exploration Geophysicists International Exposition & Annual Meeting
Deep convolutional neural networks in prestack seismic—two exploratory examples | October 2018
Poster presentation |
