Last updated: October 9, 2024

## Research Interests and Highlights

---

My research, under the mentorship of Maarten V. de Hoop and Richard G. Baraniuk, focuses on understanding and addressing AI reliability concerns through computational science principles, focusing on quantifying model uncertainty and incorporating domain-specific knowledge, e.g., system invariances, mathematical constraints, and physical principles.

I have published 39 peer-reviewed articles (citations: 830, h-index: 17, i10-index: 25), including 17 first-author papers in high-impact journals and conference proceedings, such as NeurIPS, ICML, and ICLR.

## Education

---

### Georgia Institute of Technology

Ph.D. in Computational Science and Engineering (minor in Applied Math.)  
Advised by Felix J. Herrmann

August 2022  
Atlanta, GA, USA

### University of Tehran

M.Sc. in Geophysics

March 2016  
Tehran, Iran

### Sharif University of Technology

B.Sc. in Electrical Engineering

August 2013  
Tehran, Iran

## Academic Appointments

---

### Rice University

Simons Postdoctoral Fellow  
Department of Computational Applied Mathematics & Operations Research  
Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk

August 2022 – Present  
Houston, TX, USA

## Publications

---

## Awards

---

### Future Faculty Fellows Award

Rice University, George R. Brown School of Engineering  
[link]

June 2024  
Houston, TX, USA

## Selected Research Proposal Experience

---

### Scientific ML-supported subsurface characterization in physical function spaces

Awarded, 2024

- Funding Source: Occidental Petroleum Corporation, PI: Maarten V. de Hoop
- **Contributions:** Developed ideas and contributed to writing for two of the four research thrusts entitled “Score diffusion, nonlinear operators, and uncertainty quantification in function spaces” and “Unsupervised, factorial data decomposition and hidden signals: Reservoir characterization below salt, denoising, and monitoring”

### Learning and forecasting complex fault dynamics – Predictability of earthquakes

Not funded, 2024

- Funding Source: National Science Foundation, PI: Maarten V. de Hoop
- **Contributions:** Developed ideas and contributed to writing for one of the four research thrusts entitled “Structure in data, clustering, lattice theory, and diffusion models”

### Exploring the local geometry of deep networks

Awarded, 2023

- Funding Source: Office of Naval Research (DURIP), PI: Richard G. Baraniuk
- **Contributions:** Developed ideas and wrote research objectives for one of the three research thrusts entitled “The geometry of deep probabilistic models”

**A deep-learning framework for stable, interpretable, and uncertainty-quantified hybrid modeling of multi-scale complex systems** Not funded, 2023

- ▶ Funding Source: Department of Energy, PI: Pedram Hassanzadeh
- ▶ **Contributions:** Coordinated efforts within Richard G. Baraniuk's group (a co-PI) to develop and write research objectives for one of the four research thrusts entitled "Spline operator-based analysis of Deep neural networks"

**Topological deep learning, causal inference, and data-driven forecasting for subsurface multiscale multiphysics systems** Awarded, 2022

- ▶ Funding Source: Department of Energy, PI: Maarten V. de Hoop
- ▶ **Contributions:** Led the effort to write the annual progress report

## Mentoring Experience

---

**Paul M. Mayer** [\[link\]](#) 2022 – Present  
PhD Student, Rice University Houston, TX, USA  
**Contributions:** Advised on the development of methods and software for two projects and co-authored two papers (Luzi et al., 2024a; Mayer et al., 2024)

**Rafael Orozco** [\[link\]](#) 2020 – 2022  
PhD Student, Georgia Institute of Technology Atlanta, GA, USA  
**Contributions:** Advised on the development of methods and software for main PhD thesis and co-authored four papers (Orozco et al., 2021, 2023b,c, 2024a)

**Mi Zhang** [\[link\]](#) 2019 – 2020  
Visiting PhD Student, China University of Petroleum-Beijing Atlanta, GA, USA  
**Contributions:** Advised on the development of methods and software for a project and co-authored a paper (Zhang et al., 2020)

## Teaching Experience

---

**Rice University** Houston, TX, USA  
Department of Computational Applied Mathematics & Operations Research  

- ▶ Numerical Analysis Fall 2024  
Substitute Instructor
- ▶ Numerical Analysis I Fall 2022  
Substitute Instructor (18 lectures)

**Georgia Institute of Technology** Atlanta, GA, USA  
School of Computational Science and Engineering  

- ▶ Computational Foundations of Machine Learning Spring 2022  
Teaching Assistant
- ▶ Imaging with Data-Driven Models Fall 2019  
Teaching Assistant
- ▶ Numerical Analysis I Fall 2018  
Teaching Assistant

**Sharif University of Technology** Tehran, Iran  
Department of Electrical Engineering  

- ▶ Digital Signal Processing Spring 2011  
Teaching Assistant
- ▶ Signals and Systems Spring 2011  
Teaching Assistant
- ▶ Linear Algebra Spring 2010  
Teaching Assistant
- ▶ Electrical Engineering: Principles and Laboratory Fall 2009

## Talks

---

### Invited Talks

- T22. **CNRS, Université Montpellier** January 2023  
 Low-cost uncertainty quantification for large-scale inverse problems Virtual oral presentation  
 RhEoVOLUTION Group (Dr. Andréa Tommasi)
- T21. **Workshop on Subsurface Uncertainty Description and Estimation** August 2022  
 Reliable amortized variational inference with conditional normalizing flows via physics-based latent distribution correction Oral presentation  
 International Meeting for Applied Geoscience & Energy
- T20. **Intelligent illumination of the Earth Workshop** June 2021  
 Fast and reliability-aware seismic imaging with conditional normalizing flows Virtual oral presentation  
 King Abdullah University of Science and Technology
- T19. **Advances in Seismic Imaging and Inversion Mini-symposium** October 2020  
 Unsupervised data-guided uncertainty analysis in imaging and horizon tracking Virtual oral presentation  
 The 3rd Annual Meeting of the SIAM Texas–Louisiana Section

### Contributed Talks

- T18. **International Conference on Machine Learning** July 2023  
 Unearthing InSights into Mars: Unsupervised source separation with limited data Poster presentation
- T17. **Symposium on Advances in Approximate Bayesian Inference** July 2023  
 Refining amortized posterior approximations using gradient-based summary statistics Poster presentation
- T16. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023  
 Martian time-series unraveled: A multi-scale nested approach with factorial variational autoencoders Oral presentation
- T15. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023  
 Unearthing InSights into Mars: Unsupervised source separation with limited data Oral presentation
- T14. **International Meeting for Applied Geoscience & Energy** August 2022  
 Velocity continuation with Fourier neural operators for accelerated uncertainty quantification Oral presentation
- T13. **Chrome Media Team, Google** December 2021  
 Low-bitrate speech coding with Transformers Virtual oral presentation
- T12. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021  
 Multifidelity conditional normalizing flows for physics-guided Bayesian inference Virtual oral presentation
- T11. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021  
 Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach Virtual oral presentation
- T10. **Society of Exploration Geophysicists International Exposition and Annual Meeting** September 2021  
 Learning by example: Fast reliability-aware seismic imaging with normalizing flows Virtual oral presentation  
 [video]
- T9. **Symposium on Advances in Approximate Bayesian Inference** January 2021  
 Preconditioned training of normalizing flows for variational Prerecorded short oral presentation

inference in inverse problems  
[video]

- T8. **European Association of Geoscientists & Engineers Annual Conference & Exhibition** December 2020  
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification Virtual oral presentation
- T7. **Society of Exploration Geophysicists International Exposition and Annual Meeting** October 2020  
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach Virtual oral presentation  
[video]
- T6. **Society of Exploration Geophysicists International Exposition and Annual Meeting** October 2020  
Weak deep priors for seismic imaging Virtual oral presentation  
[video]
- T5. **Society of Exploration Geophysicists Student Chapter, Georgia Tech** February 2020  
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification Oral presentation
- T4. **HotCSE Seminar, CSE Department, Georgia Institute of Technology** November 2019  
Learned imaging with constraints and uncertainty quantification Oral presentation
- T3. **Society of Exploration Geophysicists International Exposition & Annual Meeting** September 2019  
Deep-learning based ocean bottom seismic wavefield recovery Oral presentation
- T2. **Society of Exploration Geophysicists International Exposition & Annual Meeting** September 2019  
Surface-related multiple elimination with deep learning Oral presentation
- T1. **Society of Exploration Geophysicists International Exposition & Annual Meeting** October 2018  
Deep convolutional neural networks in prestack seismic—two exploratory examples Poster presentation

## Professional Service

---

### Editorial Service

- ▶ **Acta Geophysica**, Associate Editor 2024 – Present  
Applied Geophysics section
- ▶ **Journal of Mathematics**, Guest Editor 2023 – Present  
Special issue on Applied Mathematics in Inverse Problems and Uncertainty Quantification

### Conference Organization

- ▶ **International Meeting for Applied Geoscience & Energy**, Session Chair 2022
