## Research Interests and Highlights

---

My research in *scientific machine learning*, under the mentorship of Maarten V. de Hoop and Richard G. Baraniuk, aims to bridge the gap between AI and computational science by developing uncertainty-aware AI methods that incorporate domain-specific knowledge. Primarily based on generative models and amortized inference, these methods integrate system invariances, physical principles, and mathematical constraints, effectively combining the strengths of both AI and computational science. This integration enhances the robustness and trustworthiness of AI models, making them particularly valuable in complex, dynamic environments with limited computational resources and scarce high-fidelity data.

I have published 39 peer-reviewed articles (citations: 798, h-index: 17, i10-index: 24), including 17 first-author papers in high-impact journals and conference proceedings, such as NeurIPS, ICML, ICLR, Interspeech, and TMLR.

## Education

---

### Georgia Institute of Technology

Ph.D. in Computational Science and Engineering (minor in Applied Math.)  
Advised by Felix J. Herrmann

August 2022  
Atlanta, GA, USA

### University of Tehran

M.Sc. in Geophysics

March 2016  
Tehran, Iran

### Sharif University of Technology

B.Sc. in Electrical Engineering

August 2013  
Tehran, Iran

## Academic Appointments

---

### Rice University

Simons Postdoctoral Fellow  
Department of Computational Applied Mathematics & Operations Research  
Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk

August 2022 – Present  
Houston, TX, USA

## Publications

## Awards

### Future Faculty Fellows Award

Rice University, George R. Brown School of Engineering  
[link]

June 2024  
Houston, TX, USA

## Selected Research Proposal Experience

### Scientific ML-supported subsurface characterization in physical function spaces

Awarded, 2024

- Funding Source: Occidental Petroleum Corporation, PI: Maarten V. de Hoop
- **Contributions:** Developed ideas and contributed to writing for two of the four research thrusts entitled “Score diffusion, nonlinear operators, and uncertainty quantification in function spaces” and “Unsupervised, factorial data decomposition and hidden signals: Reservoir characterization below salt, denoising, and monitoring”

### Learning and forecasting complex fault dynamics – Predictability of earthquakes

Not funded, 2024

- Funding Source: National Science Foundation, PI: Maarten V. de Hoop
- **Contributions:** Developed ideas and contributed to writing for one of the four research thrusts entitled “Structure in data, clustering, lattice theory, and diffusion models”

### Exploring the local geometry of deep networks

Awarded, 2023

- Funding Source: Office of Naval Research (DURIP), PI: Richard G. Baraniuk
- **Contributions:** Developed ideas and wrote research objectives for one of the three research thrusts entitled “The geometry of deep probabilistic models”

### A deep-learning framework for stable, interpretable, and uncertainty-quantified hybrid modeling of multi-scale complex systems

Not funded, 2023

- Funding Source: Department of Energy, PI: Pedram Hassanzadeh
- **Contributions:** Coordinated efforts within Richard G. Baraniuk’s group (a co-PI) to develop and write research objectives for one of the four research thrusts entitled “Spline operator-based analysis of Deep neural networks”

### Topological deep learning, causal inference, and data-driven forecasting for subsurface multiscale multiphysics systems

Awarded, 2022

- Funding Source: Department of Energy, PI: Maarten V. de Hoop
- **Contributions:** Led the effort to write the annual progress report

## Mentoring Experience

### Paul M. Mayer [link]

PhD Student, Rice University

2022 – Present  
Houston, TX, USA

**Contributions:** Advised on the development of methods and software for two projects and co-authored two papers (Luzi et al., 2024a; Mayer et al., 2024)

<b>Rafael Orozco</b> <a href="#">[link]</a> PhD Student, Georgia Institute of Technology <b>Contributions:</b> Advised on the development of methods and software for main PhD thesis and co-authored four papers (Orozco et al., 2021, 2023b,c, 2024a)	2020 – 2022 Atlanta, GA, USA
<b>Mi Zhang</b> <a href="#">[link]</a> Visiting PhD Student, China University of Petroleum-Beijing <b>Contributions:</b> Advised on the development of methods and software for a project and co-authored a paper (Zhang et al., 2020)	2019 – 2020 Atlanta, GA, USA

## Teaching Experience
