Last updated: August 5, 2026

Research Interests

My research focuses on uncertainty quantification in complex systems that arise in computational science and engineering, with an emphasis on deep generative modeling. By integrating deep learning and scientific computing, my group develops scalable sampling techniques for high-dimensional distributions. This work enables Bayesian inference in large-scale PDE-based inverse problems (e.g., seismic and medical imaging) and provides a principled framework for building reliable, uncertainty-aware AI models for real-world applications.

Academic Appointments

University of Central Florida — August 2025 – Present
Tenure-Track Assistant Professor — Orlando, FL, USA
Department of Computer Science

Rice University — August 2022 – July 2025
Simons Postdoctoral Fellow — Houston, TX, USA
Department of Computational Applied Mathematics & Operations Research
Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk

Education

Georgia Institute of Technology — August 2022
Ph.D. in Computational Science and Engineering — Atlanta, GA, USA
Advised by Felix J. Herrmann

University of Tehran — March 2016
M.Sc. in Geophysics — Tehran, Iran

Sharif University of Technology — August 2013
B.Sc. in Electrical Engineering — Tehran, Iran

Mentoring Experience

University of Central Florida Orlando, FL, USA
Departments of Computer Science & Electrical and Computer Engineering

- Banafsheh Adami [link] 2026 – Present
  CS Ph.D. Student — co-advised with Alain Kassab
- Anirudh Thatipelli [link] 2025 – Present
  CS Ph.D. Student — Ph.D. advisor
- Davide Sabeddu [link] 2025 – 2026
  ECE Ph.D. Student — Advised on the development of methods for mitigating overfitting in generative models and co-authored a paper (A. Siahkoohi and Sabeddu, 2026)

Rice University Houston, TX, USA
Department of Computational Applied Mathematics & Operations Research

- Jeffrey J. Sam [link] 2024 – 2025
  M.Sc. Student — Advised on the design and implementation of experiments and co-authored a paper (Thatipelli et al., 2026)
- Paul M. Mayer [link] 2022 – 2025
  Ph.D. Student — Advised on the development of methods and software for two projects and co-authored two papers (Luzi et al., 2024a; Mayer et al., 2024)

Georgia Institute of Technology Atlanta, GA, USA
School of Computational Science and Engineering

- Rafael Orozco [link] 2020 – 2022
  Ph.D. Student — Advised on the development of methods and software for main Ph.D. thesis and co-authored four papers (Orozco et al., 2021, 2023b,c, 2025)
- Mi Zhang [link] 2019 – 2020
  Visiting Ph.D. Student (China University of Petroleum-Beijing) — Advised on the development of methods and software for a project and co-authored a paper (Zhang et al., 2020)

Talks

Invited Talks

T29. **IEEE Computer Society, Chapter of San Diego** — June 2025
Mitigating biases in self-consuming generative models — Virtual oral presentation
Open Research Institute (ORI)
[video]

T28. **University of Central Florida** — April 2025
Towards reliable AI: A framework for quantification of AI uncertainty — Oral presentation
Department of Computer Science

T27. **Montana State University** — March 2025
Towards reliable AI: A framework for quantification of AI uncertainty — Oral presentation
Gianforte School of Computing

T26. **The University of California, Santa Barbara** — February 2025
Towards reliable AI: A framework for quantification of AI uncertainty — Oral presentation
Department of Mechanical Engineering

T25. **Johns Hopkins University** — January 2025
Towards reliable AI: A framework for quantification of AI uncertainty — Oral presentation
Department of Electrical and Computer Engineering

T24. **ISCL Seminar Series, Pennsylvania State University** — November 2024
Mitigating biases in self-consuming generative models — Virtual oral presentation
Interdisciplinary Scientific Computing Laboratory (Dr. Romit Maulik)
[video]

T23. **CNRS, Université Montpellier** — January 2023
Low-cost uncertainty quantification for large-scale inverse problems — Virtual oral presentation
RhEoVOLUTION Group (Dr. Andréa Tommasi)

T22. **Workshop on Subsurface Uncertainty Description and Estimation** August 2022
Reliable amortized variational inference with conditional normalizing flows via physics-based latent distribution correction — Oral presentation
International Meeting for Applied Geoscience & Energy

T21. **Intelligent illumination of the Earth Workshop** June 2021
Fast and reliability-aware seismic imaging with conditional normalizing flows — Virtual oral presentation
King Abdullah University of Science and Technology

T20. **Advances in Seismic Imaging and Inversion Mini-symposium** October 2020
Unsupervised data-guided uncertainty analysis in imaging and horizon tracking — Virtual oral presentation
The 3rd Annual Meeting of the SIAM Texas–Louisiana Section

Contributed Talks

T20. **UCF Spring AI Research Day, UCF Institute of Artificial Intelligence** February 2026
Multi-scale clustering and source separation of InSight mission seismic data — Oral presentation

T19. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** November 2024
Improving fairness and mitigating MADness in generative models — Oral presentation

T18. **International Conference on Machine Learning** July 2023
Unearthing InSights into Mars: Unsupervised source separation with limited data — Poster presentation

T17. **Symposium on Advances in Approximate Bayesian Inference** July 2023
Refining amortized posterior approximations using gradient-based summary statistics — Poster presentation

T16. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023
Martian time-series unraveled: A multi-scale nested approach with factorial variational autoencoders — Oral presentation

T15. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023
Unearthing InSights into Mars: Unsupervised source separation with limited data — Oral presentation

T14. **International Meeting for Applied Geoscience & Energy** August 2022
Velocity continuation with Fourier neural operators for accelerated uncertainty quantification — Oral presentation

T13. **Chrome Media Team, Google** December 2021
Low-bitrate speech coding with Transformers — Virtual oral presentation

T12. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021
Multifidelity conditional normalizing flows for physics-guided Bayesian inference — Virtual oral presentation

T11. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach — Virtual oral presentation

T10. **Society of Exploration Geophysicists International Exposition and Annual Meeting** September 2021
Learning by example: Fast reliability-aware seismic imaging with normalizing flows — Virtual oral presentation
[video]

T9. **Symposium on Advances in Approximate Bayesian Inference** January 2021
Preconditioned training of normalizing flows for variational inference in inverse problems — Prerecorded short oral presentation
[video]

T8. **European Association of Geoscientists & Engineers Annual Conference & Exhibition** December 2020

A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification — Virtual oral presentation

T7. **Society of Exploration Geophysicists International Exposition and Annual Meeting** — October 2020
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach — Virtual oral presentation
[video]

T6. **Society of Exploration Geophysicists International Exposition and Annual Meeting** — October 2020
Weak deep priors for seismic imaging — Virtual oral presentation
[video]

T5. **Society of Exploration Geophysicists Student Chapter, Georgia Tech** — February 2020
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification — Oral presentation

T4. **HotCSE Seminar, CSE Department, Georgia Institute of Technology** — November 2019
Learned imaging with constraints and uncertainty quantification — Oral presentation

T3. **Society of Exploration Geophysicists International Exposition & Annual Meeting** — September 2019
Deep-learning based ocean bottom seismic wavefield recovery — Oral presentation

T2. **Society of Exploration Geophysicists International Exposition & Annual Meeting** — September 2019
Surface-related multiple elimination with deep learning — Oral presentation

T1. **Society of Exploration Geophysicists International Exposition & Annual Meeting** — October 2018
Deep convolutional neural networks in prestack seismic—two exploratory examples — Poster presentation
