

Ali Siahkoohi

Assistant Professor
Department of Computer Science
University of Central Florida

alisk@ucf.edu
<https://alisiahkoohi.github.io>
Last updated: February 27, 2026

Research Interests

My research focuses on uncertainty quantification in complex systems that arise in computational science and engineering, with an emphasis on deep generative modeling. By integrating deep learning and scientific computing, my group develops scalable sampling techniques for high-dimensional distributions. This work enables Bayesian inference in large-scale PDE-based inverse problems (e.g., seismic and medical imaging) and provides a principled framework for building reliable, uncertainty-aware AI models for real-world applications.

Academic Appointments

University of Central Florida Tenure-Track Assistant Professor Department of Computer Science	August 2025 – Present Orlando, FL, USA
Rice University Simons Postdoctoral Fellow Department of Computational Applied Mathematics & Operations Research Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk	August 2022 – July 2025 Houston, TX, USA

Education

Georgia Institute of Technology Ph.D. in Computational Science and Engineering Advised by Felix J. Herrmann	August 2022 Atlanta, GA, USA
University of Tehran M.Sc. in Geophysics	March 2016 Tehran, Iran
Sharif University of Technology B.Sc. in Electrical Engineering	August 2013 Tehran, Iran

Selected Research Proposal Experience

Scientific ML-supported subsurface characterization in physical function spaces

Awarded, 2024

- ▶ Funding Source: Occidental Petroleum Corporation, PI: Maarten V. de Hoop
- ▶ **Contributions:** Developed ideas and contributed to writing for two of the four research thrusts entitled “Score diffusion, nonlinear operators, and uncertainty quantification in function spaces” and “Unsupervised, factorial data decomposition and hidden signals: Reservoir characterization below salt, denoising, and monitoring”

Learning and forecasting complex fault dynamics – Predictability of earthquakes	Not funded, 2024
► Funding Source: National Science Foundation, PI: Maarten V. de Hoop	
► Contributions: Developed ideas and contributed to writing for one of the four research thrusts entitled "Structure in data, clustering, lattice theory, and diffusion models"	
Exploring the local geometry of deep networks	Awarded, 2023
► Funding Source: Office of Naval Research (DURIP), PI: Richard G. Baraniuk	
► Contributions: Developed ideas and wrote research objectives for one of the three research thrusts entitled "The geometry of deep probabilistic models"	
A deep-learning framework for stable, interpretable, and uncertainty-quantified hybrid modeling of multi-scale complex systems	Not funded, 2023
► Funding Source: Department of Energy, PI: Pedram Hassanzadeh	
► Contributions: Coordinated efforts within Richard G. Baraniuk's group (a co-PI) to develop and write research objectives for one of the four research thrusts entitled "Spline operator-based analysis of Deep neural networks"	
Topological deep learning, causal inference, and data-driven forecasting for subsurface multiscale multiphysics systems	Awarded, 2022
► Funding Source: Department of Energy, PI: Maarten V. de Hoop	
► Contributions: Led the effort to write the annual progress report	

Mentoring Experience

University of Central Florida	Orlando, FL, USA
Departments of Computer Science & Electrical and Computer Engineering	
► Davide Sabeddu [link]	2025 – Present
ECE Ph.D. Student — Ph.D. advisor	
► Anirudh Thatipelli [link]	2025 – Present
CS Ph.D. Student — Ph.D. advisor	
Rice University	Houston, TX, USA
