

Ali Siahkoohi

Assistant Professor
Department of Computer Science
University of Central Florida

alisk@ucf.edu
<https://alisiahkoohi.github.io>
Last updated: February 10, 2026

Research Interests

My research focuses on uncertainty quantification in complex systems that arise in computational science and engineering, with an emphasis on deep generative modeling. By integrating deep learning and scientific computing, my group develops scalable sampling techniques for high-dimensional distributions. This work enables Bayesian inference in large-scale PDE-based inverse problems (e.g., seismic and medical imaging) and provides a principled framework for building reliable, uncertainty-aware AI models for real-world applications.

Academic Appointments

University of Central Florida Tenure-Track Assistant Professor Department of Computer Science	August 2025 – Present Orlando, FL, USA
Rice University Simons Postdoctoral Fellow Department of Computational Applied Mathematics & Operations Research Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk	August 2022 – July 2025 Houston, TX, USA

Education

Georgia Institute of Technology Ph.D. in Computational Science and Engineering Advised by Felix J. Herrmann	August 2022 Atlanta, GA, USA
University of Tehran M.Sc. in Geophysics	March 2016 Tehran, Iran
Sharif University of Technology B.Sc. in Electrical Engineering	August 2013 Tehran, Iran

Awards

Future Faculty Fellows Award

Rice University, George R. Brown School of Engineering and Computing
[link]

June 2024

Houston, TX, USA

Selected Research Proposal Experience

Scientific ML-supported subsurface characterization in physical function spaces

Awarded, 2024

- Funding Source: Occidental Petroleum Corporation, PI: Maarten V. de Hoop
- **Contributions:** Developed ideas and contributed to writing for two of the four research thrusts entitled “Score diffusion, nonlinear operators, and uncertainty quantification in function spaces” and “Unsupervised, factorial data decomposition and hidden signals: Reservoir characterization below salt, denoising, and monitoring”

Learning and forecasting complex fault dynamics – Predictability of earthquakes

Not funded, 2024

- Funding Source: National Science Foundation, PI: Maarten V. de Hoop
- **Contributions:** Developed ideas and contributed to writing for one of the four research thrusts entitled “Structure in data, clustering, lattice theory, and diffusion models”

Exploring the local geometry of deep networks

Awarded, 2023

- Funding Source: Office of Naval Research (DURIP), PI: Richard G. Baraniuk
- **Contributions:** Developed ideas and wrote research objectives for one of the three research thrusts entitled “The geometry of deep probabilistic models”

A deep-learning framework for stable, interpretable, and uncertainty-quantified hybrid modeling of multi-scale complex systems

Not funded, 2023

- ▶ Funding Source: Department of Energy, PI: Pedram Hassanzadeh
- ▶ Contributions: Coordinated efforts within Richard G. Baraniuk's group (a co-PI) to develop and write research objectives for one of the four research thrusts entitled "Spline operator-based analysis of Deep neural networks"

Topological deep learning, causal inference, and data-driven forecasting for subsurface multiscale multiphysics systems

Awarded, 2022

- ▶ Funding Source: Department of Energy, PI: Maarten V. de Hoop
- ▶ Contributions: Led the effort to write the annual progress report

Mentoring Experience

University of Central Florida

Orlando, FL, USA

Departments of Computer Science & Electrical and Computer Engineering

- ▶ Davide Sabeddu [[link](#)] 2025 – Present
ECE Ph.D. Student — Ph.D. advisor
- ▶ Anirudh Thatipelli [[link](#)] 2025 – Present

Talks

Invited Talks

T29. IEEE Computer Society, Chapter of San Diego	June 2025
Mitigating biases in self-consuming generative models	
Open Research Institute (ORI)	Virtual oral presentation
[video]	
T28. University of Central Florida	April 2025
Towards reliable AI: A framework for quantification of AI uncertainty	
Department of Computer Science	Oral presentation
T27. Montana State University	March 2025
Towards reliable AI: A framework for quantification of AI uncertainty	
Gianforte School of Computing	Oral presentation
T26. The University of California, Santa Barbara	February 2025
Towards reliable AI: A framework for quantification of AI uncertainty	
Department of Mechanical Engineering	Oral presentation
T25. Johns Hopkins University	January 2025
Towards reliable AI: A framework for quantification of AI uncertainty	
Department of Electrical and Computer Engineering	Oral presentation
T24. ISCL Seminar Series, Pennsylvania State University	November 2024
Mitigating biases in self-consuming generative models	
Interdisciplinary Scientific Computing Laboratory (Dr. Romit Maulik)	Virtual oral presentation
[video]	
T23. CNRS, Université Montpellier	January 2023
Low-cost uncertainty quantification for large-scale inverse problems	
RhEoVOLUTION Group (Dr. Andréa Tommasi)	Virtual oral presentation
T22. Workshop on Subsurface Uncertainty Description and Estimation	August 2022
Reliable amortized variational inference with conditional normalizing flows via	
physics-based latent distribution correction	Oral presentation
International Meeting for Applied Geoscience & Energy	

T21. **Intelligent illumination of the Earth Workshop** June 2021
Fast and reliability-aware seismic imaging with conditional normalizing flows Virtual oral presentation
King Abdullah University of Science and Technology

T20. **Advances in Seismic Imaging and Inversion Mini-symposium** October 2020
Unsupervised data-guided uncertainty analysis in imaging and horizon tracking
Virtual oral presentation
The 3rd Annual Meeting of the SIAM Texas–Louisiana Section

Contributed Talks

- T20. **UCF Spring AI Research Day, UCF Institute of Artificial Intelligence** February 2026
Multi-scale clustering and source separation of InSight mission seismic data Oral presentation
- T19. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** November 2024
Improving fairness and mitigating MADness in generative models Oral presentation
- T18. **International Conference on Machine Learning** July 2023
Unearthing InSights into Mars: Unsupervised source separation with limited data Poster presentation
- T17. **Symposium on Advances in Approximate Bayesian Inference** July 2023
Refining amortized posterior approximations using gradient-based summary statistics Poster presentation
- T16. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023
Martian time-series unraveled: A multi-scale nested approach with factorial variational autoencoders Oral presentation
- T15. **Geo-Mathematical Imaging Group Partners Meeting, Rice University** May 2023
Unearthing InSights into Mars: Unsupervised source separation with limited data Oral presentation
- T14. **International Meeting for Applied Geoscience & Energy** August 2022
Velocity continuation with Fourier neural operators for accelerated uncertainty quantification Oral presentation
- T13. **Chrome Media Team, Google** December 2021
Low-bitrate speech coding with Transformers Virtual oral presentation
- T12. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021
Multifidelity conditional normalizing flows for physics-guided Bayesian inference Virtual oral presentation
- T11. **ML4SEISMIC Partners Meeting, Georgia Institute of Technology** November 2021
Uncertainty quantification in imaging and automatic horizon tracking—A Bayesian deep-prior based approach Virtual oral presentation
- T10. **Society of Exploration Geophysicists International Exposition and Annual Meeting** September 2021
Learning by example: Fast reliability-aware seismic imaging with normalizing flows Virtual oral presentation
[video]
- T9. **Symposium on Advances in Approximate Bayesian Inference** January 2021
Preconditioned training of normalizing flows for variational inference in inverse problems Prerecorded short oral presentation
[video]
- T8. **European Association of Geoscientists & Engineers Annual Conference & Exhibition** December 2020
A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification Virtual oral presentation
- T7. **Society of Exploration Geophysicists International Exposition and Annual Meeting** October 2020
Uncertainty quantification in imaging and automatic horizon tracking—A Virtual oral presentation

Bayesian deep-prior based approach [video]		
T6. Society of Exploration Geophysicists International Exposition and Annual Meeting Weak deep priors for seismic imaging [video]	October 2020	Virtual oral presentation
T5. Society of Exploration Geophysicists Student Chapter, Georgia Tech A deep-learning based Bayesian approach to seismic imaging and uncertainty quantification	February 2020	Oral presentation
T4. HotCSE Seminar, CSE Department, Georgia Institute of Technology Learned imaging with constraints and uncertainty quantification	November 2019	Oral presentation
T3. Society of Exploration Geophysicists International Exposition & Annual Meeting Deep-learning based ocean bottom seismic wavefield recovery	September 2019	Oral presentation
T2. Society of Exploration Geophysicists International Exposition & Annual Meeting Surface-related multiple elimination with deep learning	September 2019	Oral presentation
T1. Society of Exploration Geophysicists International Exposition & Annual Meeting Deep convolutional neural networks in prestack seismic—two exploratory examples	October 2018	Poster presentation
