Last updated: May 31, 2026

Research Interests

My research focuses on uncertainty quantification in complex systems that arise in computational science and engineering, with an emphasis on deep generative modeling. By integrating deep learning and scientific computing, my group develops scalable sampling techniques for high-dimensional distributions. This work enables Bayesian inference in large-scale PDE-based inverse problems (e.g., seismic and medical imaging) and provides a principled framework for building reliable, uncertainty-aware AI models for real-world applications.

Academic Appointments

University of Central Florida
Tenure-Track Assistant Professor
Department of Computer Science

August 2025 – Present
Orlando, FL, USA

Rice University
Simons Postdoctoral Fellow
Department of Computational Applied Mathematics & Operations Research
Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk

August 2022 – July 2025
Houston, TX, USA

Education

Georgia Institute of Technology
Ph.D. in Computational Science and Engineering
Advised by Felix J. Herrmann

August 2022
Atlanta, GA, USA

University of Tehran
M.Sc. in Geophysics

March 2016
Tehran, Iran

Sharif University of Technology
B.Sc. in Electrical Engineering

August 2013
Tehran, Iran

Awards

Selected Research Proposal Experience

- Scientific ML-supported subsurface characterization in physical function spaces** Awarded, 2024
- ▶ Funding Source: Occidental Petroleum Corporation, PI: Maarten V. de Hoop
 - ▶ **Contributions:** Developed ideas and contributed to writing for two of the four research thrusts entitled “Score diffusion, nonlinear operators, and uncertainty quantification in function spaces” and “Unsupervised, factorial data decomposition and hidden signals: Reservoir characterization below salt, denoising, and monitoring”
- Learning and forecasting complex fault dynamics – Predictability of earthquakes** Not funded, 2024
- ▶ Funding Source: National Science Foundation, PI: Maarten V. de Hoop
 - ▶ **Contributions:** Developed ideas and contributed to writing for one of the four research thrusts entitled “Structure in data, clustering, lattice theory, and diffusion models”
- Exploring the local geometry of deep networks** Awarded, 2023
- ▶ Funding Source: Office of Naval Research (DURIP), PI: Richard G. Baraniuk
 - ▶ **Contributions:** Developed ideas and wrote research objectives for one of the three research thrusts entitled “The geometry of deep probabilistic models”
- A deep-learning framework for stable, interpretable, and uncertainty-quantified hybrid modeling of multi-scale complex systems** Not funded, 2023
- ▶ Funding Source: Department of Energy, PI: Pedram Hassanzadeh
 - ▶ **Contributions:** Coordinated efforts within Richard G. Baraniuk’s group (a co-PI) to develop and write research objectives for one of the four research thrusts entitled “Spline operator-based analysis of Deep neural networks”
- Topological deep learning, causal inference, and data-driven forecasting for subsurface multiscale multiphysics systems** Awarded, 2022
- ▶ Funding Source: Department of Energy, PI: Maarten V. de Hoop
 - ▶ **Contributions:** Led the effort to write the annual progress report

Mentoring Experience

- University of Central Florida** Orlando, FL, USA
Departments of Computer Science & Electrical and Computer Engineering
- ▶ Banafsheh Adami [link] Fall 2026 (incoming)
CS Ph.D. Student — co-advised with Alain Kassab
 - ▶ Anirudh Thatipelli [link] 2025 – Present
CS Ph.D. Student — Ph.D. advisor
 - ▶ Davide Sabeddu [link] 2025 – 2026
ECE Ph.D. Student — Advised on the development of methods for mitigating overfitting in generative models and co-authored a paper (A. Siahkoohi and Sabeddu, 2026)
- Rice University** Houston, TX, USA
Department of Computational Applied Mathematics & Operations Research
- ▶ Jeffrey J. Sam [link] 2024 – 2025
M.Sc. Student — Advised on the design and implementation of experiments and co-authored a paper (Thatipelli et al., 2026)
 - ▶ Paul M. Mayer [link] 2022 – 2025
Ph.D. Student — Advised on the development of methods and software for two projects and co-authored two papers (Luzi et al., 2024a; Mayer et al., 2024)

Georgia Institute of Technology	Atlanta, GA, USA
School of Computational Science and Engineering	
▶ Rafael Orozco [link]	2020 – 2022
Ph.D. Student — Advised on the development of methods and software for main Ph.D. thesis and co-authored four papers (Orozco et al., 2021, 2023b,c, 2025)	
▶ Mi Zhang [link]	2019 – 2020
Visiting Ph.D. Student (China University of Petroleum-Beijing) — Advised on the development of methods and software for a project and co-authored a paper (Zhang et al., 2020)
