Last updated: May 26, 2026

## Research Interests

---

My research focuses on uncertainty quantification in complex systems that arise in computational science and engineering, with an emphasis on deep generative modeling. By integrating deep learning and scientific computing, my group develops scalable sampling techniques for high-dimensional distributions. This work enables Bayesian inference in large-scale PDE-based inverse problems (e.g., seismic and medical imaging) and provides a principled framework for building reliable, uncertainty-aware AI models for real-world applications.

## Academic Appointments

---

**University of Central Florida**  
Tenure-Track Assistant Professor  
Department of Computer Science

August 2025 – Present  
Orlando, FL, USA

**Rice University**  
Simons Postdoctoral Fellow  
Department of Computational Applied Mathematics & Operations Research  
Jointly hosted by Maarten V. de Hoop and Richard G. Baraniuk

August 2022 – July 2025  
Houston, TX, USA

## Education

---

**Georgia Institute of Technology**  
Ph.D. in Computational Science and Engineering  
Advised by Felix J. Herrmann

August 2022  
Atlanta, GA, USA

**University of Tehran**  
M.Sc. in Geophysics

March 2016  
Tehran, Iran

**Sharif University of Technology**  
B.Sc. in Electrical Engineering

August 2013  
Tehran, Iran

## Publications

## Awards

---

### Future Faculty Fellows Award

Rice University, George R. Brown School of Engineering and Computing  
[link]

June 2024  
Houston, TX, USA

## Selected Research Proposal Experience

---

- Scientific ML-supported subsurface characterization in physical function spaces** Awarded, 2024
- ▶ Funding Source: Occidental Petroleum Corporation, PI: Maarten V. de Hoop
  - ▶ **Contributions:** Developed ideas and contributed to writing for two of the four research thrusts entitled “Score diffusion, nonlinear operators, and uncertainty quantification in function spaces” and “Unsupervised, factorial data decomposition and hidden signals: Reservoir characterization below salt, denoising, and monitoring”
- Learning and forecasting complex fault dynamics – Predictability of earthquakes** Not funded, 2024
- ▶ Funding Source: National Science Foundation, PI: Maarten V. de Hoop
  - ▶ **Contributions:** Developed ideas and contributed to writing for one of the four research thrusts entitled “Structure in data, clustering, lattice theory, and diffusion models”
- Exploring the local geometry of deep networks** Awarded, 2023
- ▶ Funding Source: Office of Naval Research (DURIP), PI: Richard G. Baraniuk
  - ▶ **Contributions:** Developed ideas and wrote research objectives for one of the three research thrusts entitled “The geometry of deep probabilistic models”
- A deep-learning framework for stable, interpretable, and uncertainty-quantified hybrid modeling of multi-scale complex systems** Not funded, 2023
- ▶ Funding Source: Department of Energy, PI: Pedram Hassanzadeh
  - ▶ **Contributions:** Coordinated efforts within Richard G. Baraniuk’s group (a co-PI) to develop and write research objectives for one of the four research thrusts entitled “Spline operator-based analysis of Deep neural networks”
- Topological deep learning, causal inference, and data-driven forecasting for subsurface multiscale multiphysics systems** Awarded, 2022
- ▶ Funding Source: Department of Energy, PI: Maarten V. de Hoop
  - ▶ **Contributions:** Led the effort to write the annual progress report

## Mentoring Experience

---

- University of Central Florida** Orlando, FL, USA
- Departments of Computer Science & Electrical and Computer Engineering
- ▶ Banafsheh Adami [link] Fall 2026 (incoming)  
CS Ph.D. Student — co-advised with Alain Kassab
  - ▶ Davide Sabeddu [link] 2025 – Present  
ECE Ph.D. Student — Ph.D. advisor
  - ▶ Anirudh Thatipelli [link] 2025 – Present  
CS Ph.D. Student — Ph.D. advisor
- Rice University** Houston, TX, USA
- Department of Computational Applied Mathematics & Operations Research
- ▶ Jeffrey J. Sam [link] 2024 – present  
M.Sc. Student — Advised on the design and implementation of experiments and co-authored a paper (Thatipelli et al., 2026)
  - ▶ Paul M. Mayer [link] 2022 – 2025  
Ph.D. Student — Advised on the development of methods and software for two projects and co-authored two papers (Luzi et al., 2024a; Mayer et al., 2024)
- Georgia Institute of Technology** Atlanta, GA, USA
- School of Computational Science and Engineering
- ▶ Rafael Orozco [link] 2020 – 2022  
Ph.D. Student — Advised on the development of methods and software for main Ph.D. thesis and co-authored four papers (Orozco et al., 2021, 2023b,c, 2025)

- ▶ **Mi Zhang** [\[link\]](#) 2019 – 2020  
Visiting Ph.D. Student (China University of Petroleum-Beijing) — Advised on the development of methods and software for a project and co-authored a paper (Zhang et al., 2020)

## Talks

---

### Invited Talks

- T29. **IEEE Computer Society, Chapter of San Diego** June 2025  
Mitigating biases in self-consuming generative models Virtual oral presentation  
Open Research Institute (ORI)  
[\[video\]](#)
- T28. **University of Central Florida** April 2025  
Towards reliable AI: A framework for quantification of AI uncertainty Oral presentation  
Department of Computer Science

|      |                                                                                                                                                                                                                                                                  |                                            |

## Professional Service

---

### Editorial Service

- **Acta Geophysica**, Associate Editor  
Applied Geophysics section 2024 – Present
- **Journal of Mathematics**, Guest Editor 2023 – 2024  
Special issue on Applied Mathematics in Inverse Problems and Uncertainty Quantification

### Conference Organization

- **International Meeting for Applied Geoscience & Energy**, Session Chair 2022

## Technical Program Committee Member and Reviewer

- ▶ The Conference on Uncertainty in Artificial Intelligence (UAI) 2026
- ▶ Symposium on Probabilistic Machine Learning (ProbML) 2026
- ▶ International Conference on Machine Learning (ICML) 2024 – 2026
- ▶ International Conference on Learning Representations (ICLR) 2024 – 2026
- ▶ Annual AAAI Conference on Artificial Intelligence 2025 – 2026
- ▶ Structured Probabilistic Inference & Generative Modeling 2023 – 2025
- ▶ Frontiers in Probabilistic Inference: Sampling Meets Learning 2025
- ▶ Neural Information Processing Systems (NeurIPS) 2023 – 2025
- ▶ Artificial Intelligence and Statistics Conference (AISTATS) 2024 – 2025
- ▶ Advances in Approximate Bayesian Inference (AABI) 2023 – 2024
- ▶ Structured Probabilistic Inference & Generative Modeling (ICML workshop) 2023 – 2024
- ▶ International Speech Communication Association (Interspeech) 2023
- ▶ Deep Generative Models for Health (NeurIPS workshop) 2023
- ▶ International Meeting for Applied Geoscience & Energy 2023

## Journal Reviewer

- ▶ Transactions on Machine Learning Research
- ▶ IEEE Transactions on Computational Imaging
- ▶ IEEE Transactions on Neural Networks and Learning Systems
- ▶ IEEE Geoscience and Remote Sensing Letters
- ▶ IEEE Transactions on Geoscience and Remote Sensing
- ▶ Notices of the American Mathematical Society (AMS)
- ▶ Remote Sensing
- ▶ Journal of Geophysical Research – Solid Earth
- ▶ Geophysical Prospecting
- ▶ Geophysics
- ▶ Geosciences
- ▶ Entropy
- ▶ Journal of Medical Imaging
